GLHN IS SELECTED FOR \$4-5 MILLION RENOVATION IN AMERICAN SAMOA
Tucson firm will provide professional services to LBJ Tropical Medical Center

Tucson, Arizona (May 12, 2010)—GLHN Architects & Engineers, Inc. of Tucson has been selected to provide professional services for an estimated \$4-5 million renovation to the Lyndon Baines Johnson Tropical Medical Center in Pago Pago, American Samoa. The GLHN design team will be guided by Senior Mechanical Designer, Mitch Hart, who served as Project Manager for numerous infrastructure upgrades at the hospital before joining the firm in 2008.

American Samoa, known as “the cradle of Polynesia,” is located in the South Pacific north of New Zealand near Fiji and Tonga. LBJ Medical Center, a 128-bed general acute care hospital, is the only hospital in the territory and provides the only clinical laboratory, diagnostic imaging, and outpatient pharmacy services for American Samoa’s 65,000 residents. The facility was completed in 1968.
